

Quattro Pro

XLCgo

GCDHH supplies no-cost personal amplifiers to qualified applicants through the Georgia Telecommunications Equipment Distribution Program (GATEDP). If you need some extra sound while you are out and about, we've got you covered!

### **Clarity XLCgo**

The XLCgo is an amplifier designed to pair with your cell phone. It is a wireless amplifier that can be taken around with you to hear phone calls from your cell phone using an extra loud amplifier that goes up to 50 decibels, tone control, and large easy to see buttons. This device can be taken with you out of the house to hear calls from your cellphone using a more powerful speaker, and includes a belt clip, lanyard, and car air vent holder so that you can always have it in a convenient location.

This amplifier is ideal for someone who uses their cell phone often and wants to be able to amplify their calls while they are on the go.

### **Clearsounds Quattro Pro**

The Quattro Pro is a Bluetooth amplifier that you wear around your neck. It can be used with your smartphone to amplify phone calls or audio, and includes a detachable microphone that can be placed near an audio source in the room so that you can hear more clearly. The quattro pro comes with wired earbuds that can be plugged into the amplifier so that your phone calls remain private.

This amplifier is ideal for someone who needs amplification for both their phone and from audio in the room they are in such as a meeting.
