

Quattro Pro Set Up Instructions:

1. Open the box and remove the black container.
2. Take out all items and remove the plastic.
3. There should be 7 items total:

a. Quattro Pro Main Unit & Neckloop

b. QTPro Bluetooth Mic

c. AC adapter

d. USB Charging Cable

e. SmartSound Ear Buds

f. Extra Ear Buds

g. User Guide

How to Use the Quattro Pro:

1. Volume and Scroll Buttons

- These buttons are used to raise or lower volume and scroll through the menu options

2. Sensor Button

- This button is used to answer/end phone calls and play/pause music. If you tap this button twice, it will activate voice control. If you wish to reset this device, press and hold the button down.

3. Headset Jack

- Insert the SmartSound Ear Buds into here. You can use any other headphone set as well.

4. Charging Port

- This is for charging the device. insert the small end of the USB cable into here and plug the other side into the wall

5. Multi-Function Button

- For powering on/off: press and hold button until you see the Power On/Power Off option
- For pairing to Bluetooth: press and hold button, you will see the Power On option, keep holding until you see “Pairing” on the screen
- For voice control: tap the button twice to activate voice control
- For answering/ending phone calls: press the button once to answer a call. Hold the button down to decline or end a call.

For the QTPro Mic:

6. Microphone Multi-Function

Button

- For pairing to Bluetooth: To connect, press and hold the button until the light flashes blue. To disconnect, press and hold button for 3 seconds, the light will flash rapidly.

- For turning off: press and hold the button down for 6 seconds.
- For adjusting the sensitivity level: press the button once to raise the sensitivity level by one. There are 4 sensitivity levels total.

To Charge:

- On the back of the QTPro Mic and the QTPro main unit, there are charging ports. The two prongs sticking out of the Mic will fit into the two holes on the QTPro.
- They will magnetically stick together.
- *Both buttons must be turned to + to charge.
- Once these are connected, you can plug in the USB charging cable to charge the Microphone.

How to Connect to Bluetooth:

1. Make sure the Quattro Pro main unit (not the Mic) is turned off.
2. Put the device you would like to connect to into pairing mode. If connecting to an iPhone, turn Bluetooth on.
3. On the QTPro main unit, hold the Multi-Function button down. First, it will show “Power ON”, continue holding the button until you see “Pairing” on the screen.
4. When you see the name of the device on the QTPro screen, it has been connected. For example, if you are connecting “Joe’s iPhone”, you will see that pop up on the screen.
